

West Main Hill Crash Data Summary

Jan 1, 2013 - May 27, 2023

- Over a nearly 10½-year period, there have been 18 reported crashes in the immediate surrounding area:
 - All the crashes are low-severity, Property Damage Only crashes, with no reported personal injuries.
 - There were no reported crashes at the Valley Street and Academy Street intersection at any time, during winter periods, either before or after the placement of the STOP sign on Valley St.
- On average, there is about 1.7 reported crashes a year, a very low number
- The reported crash details show:
 - 6 were single vehicle crashes – Indicative of Careless driving
 - 5 were in snow conditions – Indicative of speed too fast for conditions
 - 4 were sideswipe crashes – Indicative of Carelessness and speed too fast for conditions
 - 3 were rear-end crashes – Indicative of speed too fast for conditions
 - 2 were backing crashes – Indicative of careless driving

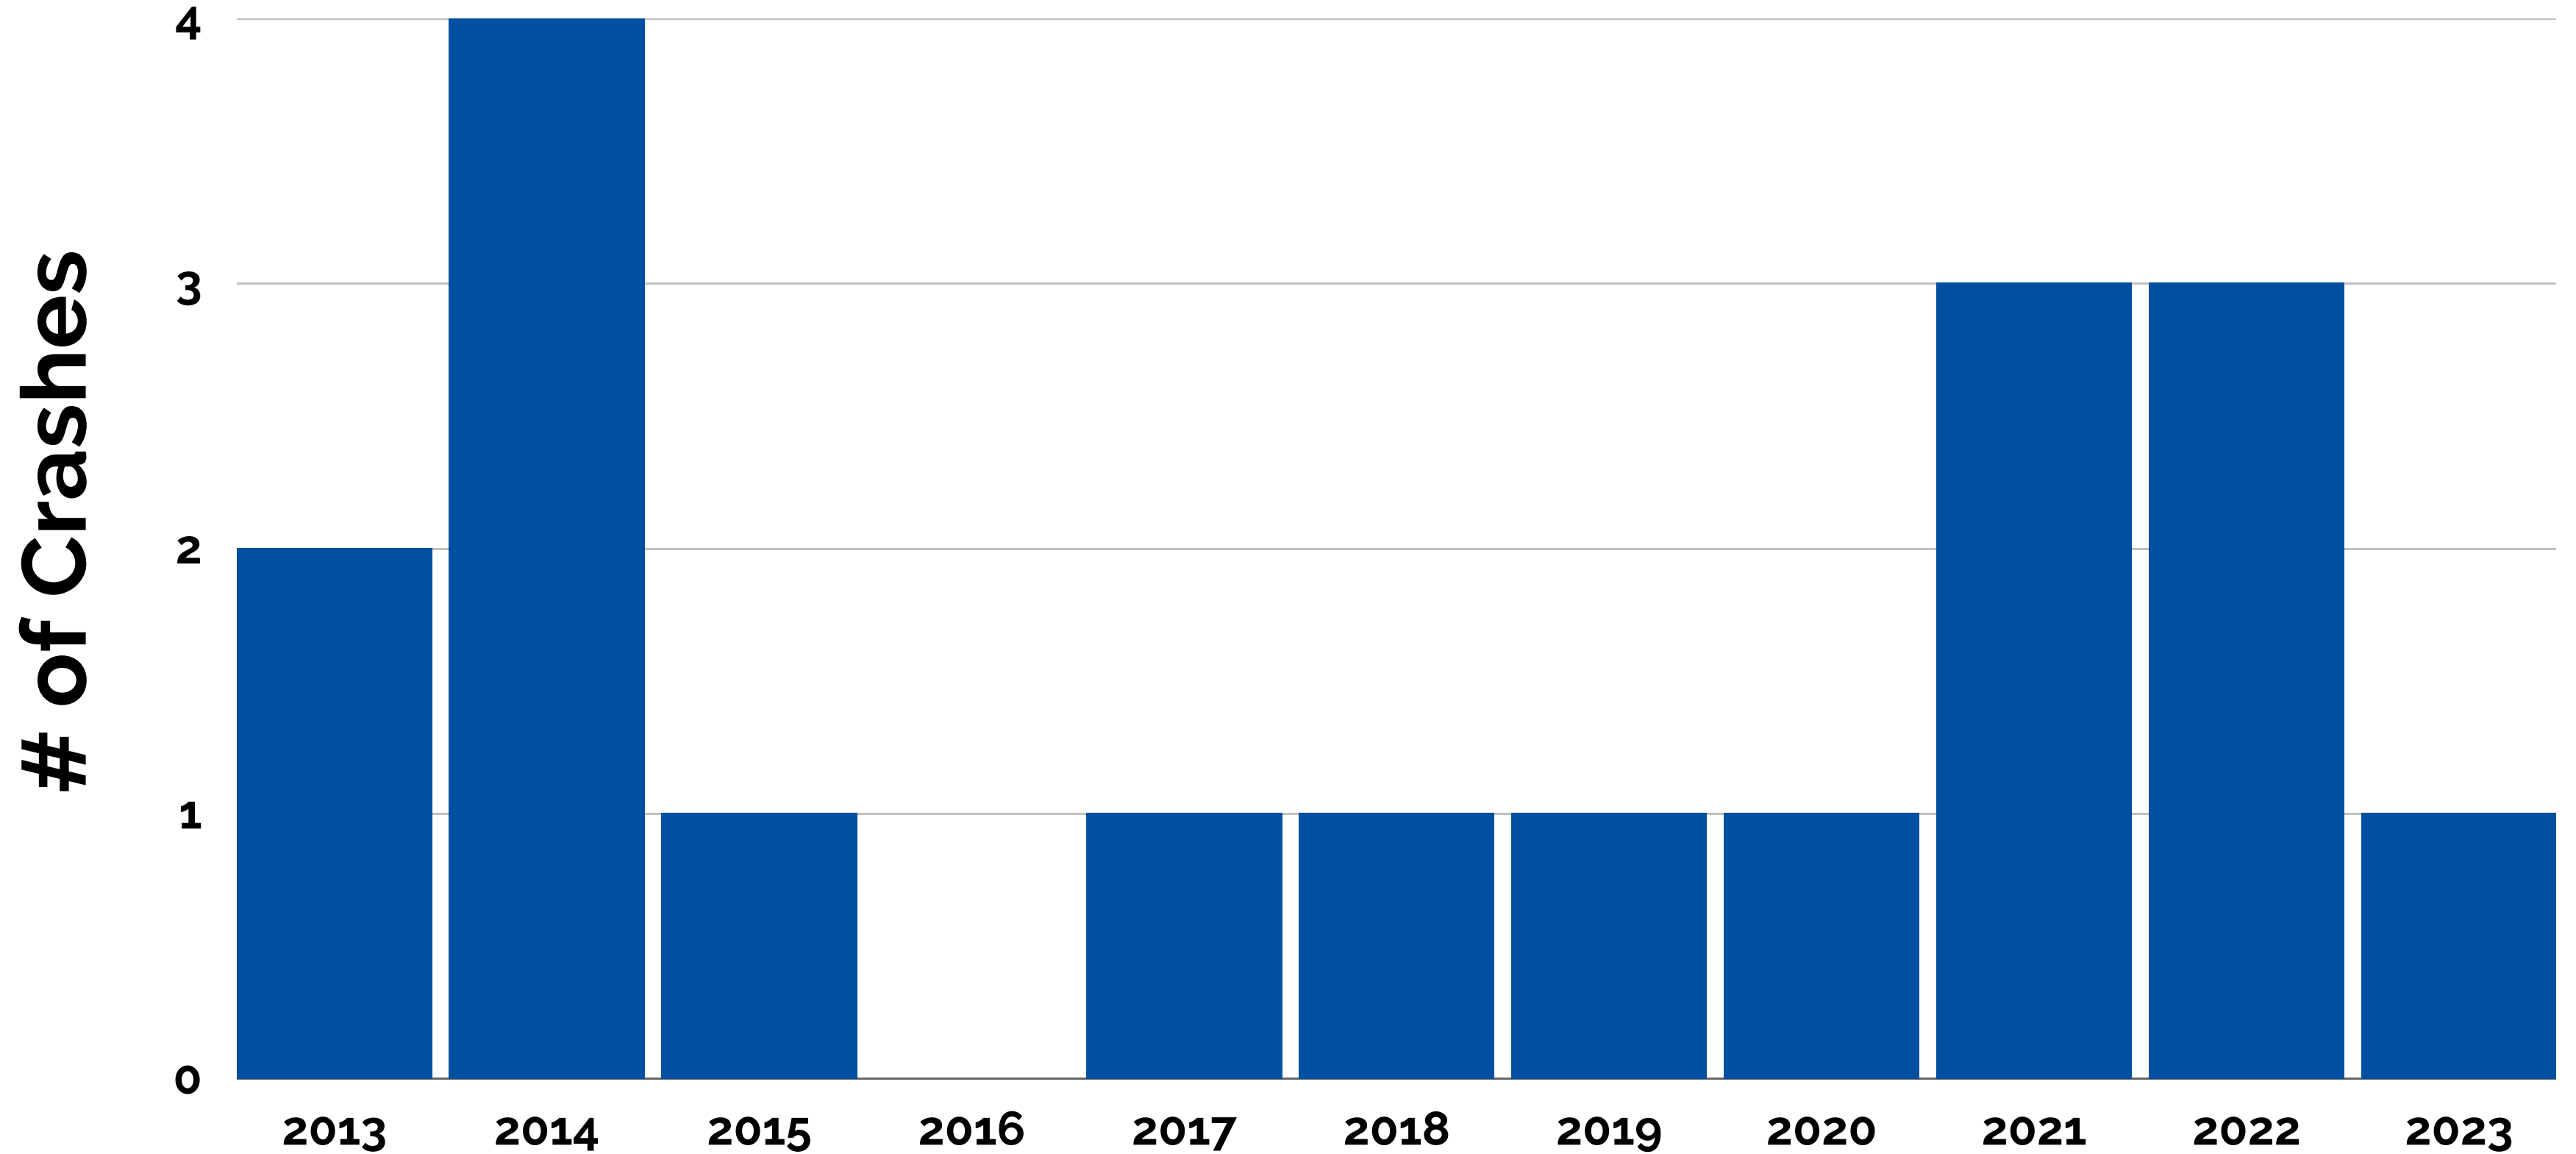

In general, the crash picture shows carelessness and speed to be the crash problem in the area.
